

Patrick Galbraith

608 Jarman Hill Rd. Sharon, NH 03458 - patg@patg.net - <http://patg.net> - 603-769-0829

Summary of Experience

30 years of technical experience ranging from electronics, software development, automation, database administration, system architecture, and sometimes firefighting. 23 years of rapid learning, embracing, and leveraging Linux and other open source projects to solve real problems and create value.

Skills

- Cloud: Kubernetes, Helm, Xen hypervisor, AWS, CoreOS, Terraform, OpenStack
- Databases: MySQL (Oracle ACE), Postgresql, Oracle, MongoDB, Couchbase, etcd, ElasticSearch
- Languages: Go, Python, C/C++, Javascript, PHP, Perl
- Devops: Ansible, Chef, Vagrant, Fleet
- Networking: Switches, routers, PFsense, firewalling
- Monitoring/Logging: ELKstack, Nagios/Icinga, Sensu
- Electronics, Wireless Broadband (WISP), Alvarion, Motorola
- Local Government (previous town selectman)

Professional History

Development, Devops, DBA, consultant, May 2015 - Current

Maintain MySQL database backends and system high-availability for <http://healthjobsnationwide.com>, the country's largest healthcare and talent acquisition job board, as well as other clients.

- 24/7 Database monitoring and administration for application databases
- Migrated properties from on-premise bare-metal to AWS
- Custom development for features on <http://healthjobsnationwide.com>
- Full Automation of cloud-based assets using Ansible and Terraform on AWS
- Development and maintenance of monitoring system

Principal Engineer, Hewlett Packard Enterprise, November 2011 - June 2017

Hewlett Packard Enterprise New Cloud Stack, HP Cloud, HP Advanced Technology Group, geographically distributed

- As a lead engineer in the Advanced Technology Group at HPE, took part in various R&D technology which eventually lead to the prototype and and productization of the HPE New Stack project.
- Developed the New Stack Configuration Manager service running in Kubernetes
- Contributed open-sourced work upstream to Ansible, Kubernetes, and Helm projects
- Technical Lead of DNSaaS (Designate) for HP's Openstack-based cloud
- Technical Lead of Database Information Systems for HP Cloud Responsible for clustered MySQL backend servers and OpenStack data availability requirements
- Developed a cloud-based database scaling architecture proposal for Samsung Appstore.

Senior Systems and Database Administrator, Blue Gecko, October 2010 - October 2011

- Performed remote database administration (DBA), development, and systems architectural expertise to various clients for various application components and backing databases (MySQL and NoSQL).
- Custom development of storage engines and user-defined functions
- Development of database scale-out plans using sharding and replication
- [Oracle ACE award](#)

Patrick Galbraith

608 Jarman Hill Rd. Sharon, NH 03458 - patg@patg.net - <http://patg.net> - 603-769-0829

Senior Software Developer, NorthScale Inc. (Now Couchbase), July 2009 - September 2010

First responder and institutional communications and next generation 911 systems.

- R&D, prototyped, and early product development during start-up phase of the Membase Database, now known as Couchbase.
- Developed a build system for Linux and Windows product binaries

Principal Software Engineer, Lycos Inc., October 2008 to July 2009

- Developed SaaS for popular PHP applications (Drupal, Joomla, Mediawiki, etc) and MySQL into the existing Tripod infrastructure
- Migrated Tripod.com from Oracle to MySQL. This included modifications to Java-based applications and moving stored-procedure logic to application code

Senior Software Developer and Database Administrator - Grazr Inc., January 2007 - October 2008

- Developed Feed Processing web applications
- Implemented both schema and database scale out architecture, and ensured 24/7 availability of backend replicated database systems
- Implemented overall systems monitoring

Senior Systems Engineer, MySQL Inc., January 2004 - January 2007

The world's most popular Open Source Database - participated as a member of a globally distributed team

- Developed storage engines
- Developed Partitioning features
- Developed client drivers
- Developed parser language additions
- Built an automation system for MySQL binary builds for Linux and MS Windows

Senior Software Developer, [Open Source Technology Group](#) (OSTG), August 1999 - September 2002

- Technical manager, developer, and operations of [Slashdot.org](#)
- Optimized Slashdot database and source code, server hardware, and server OS.
- Developed relationship with MySQL AB and sponsored development of initial MySQL replication features
- Added caching layer and troll filters to Slashdot codebase to handle burgeoning traffic
- Developed Linux Foundries and Linux.com website

Senior Software Developer, DBA, Application Team Lead, [Cobalt Group](#), March 1998 - July 1999

- Developed database-driven web applications for automotive manufacturers and dealers.
- Performed DBA tasks such as database schema design, implementing 24/7 database monitoring
- Migrated Application backend database to Oracle

Other

- Selectman, [Town of Sharon, NH](#), March 2011 - October 2013
- Principal, part-owner, Radius North Communications, January 2007 - June 2010
- Fire Control Technician, FC3, USS Leahy (CG-16), United States Navy, 8/1986 - 8/1992, Desert Storm veteran

Consulting and Before 1999

- Refer to <http://patg.net/various.html>

Publications and other projects

- "[Developing Web Applications with Apache, MySQL, memcached, and Perl](#)" (English, Mandarin), Wiley, ISBN: 978-0-470-41464-4
- "[Expert PHP and MySQL](#)", Wiley, ISBN: 978-0-470-56312-0
- [Galera MySQL Cluster on Kubernetes contribution](#)
- Oracle ACE award https://apex.oracle.com/pls/otn/f?p=19297:4:896909223092578::NO:4:P4_ID:3300
- Public maintainer/developer of [DBD::mysql](#), Perl database driver for the MySQL RDBMS, 2004 - current
- Github - <https://github.com/CaptTofu?tab=repositories>
- Speaking engagements and tutorials at OSCON, MySQL Users Conference, Percona Live, OpenStack Summer, CoreOS Fest, AnsibleFest, and Cloud Computing Expo 2004-current. Details: <http://patg.net/speaking.html>

Education

BSCS - In progress, Bellevue College (1992-current)

US Navy Fire Control A and C schools (1986-1988)

Intensive technical training focused on general Electronics, Computer (digital and analogue), and waveguide theory and microwave concepts to specific fire control systems
